# Balo-2: lesions from the RNA, and what the stains show there (25 µm bins)

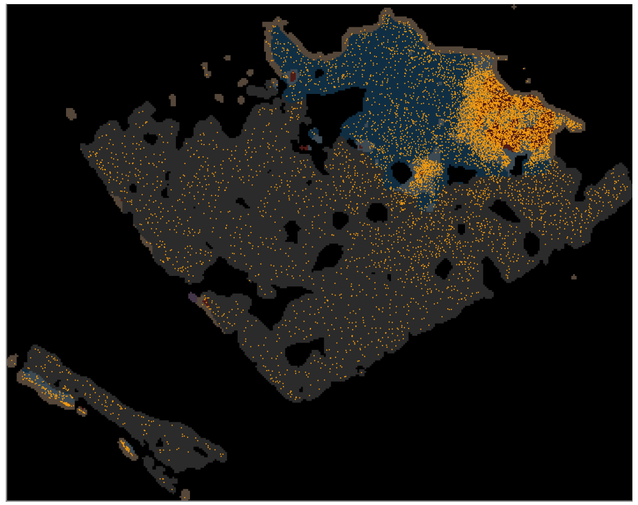

zones: WM myelinated (blue) / partial (light) / demyelinated (red), grey matter (grey), meninges & roots (violet), subpial rim (beige)

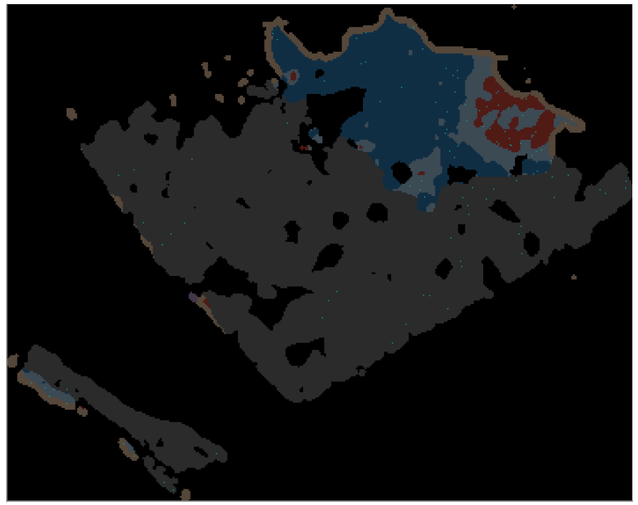

myelin RNA share ÷ section's myelinated WM; white contour = neuron share 0.05 (grey matter)

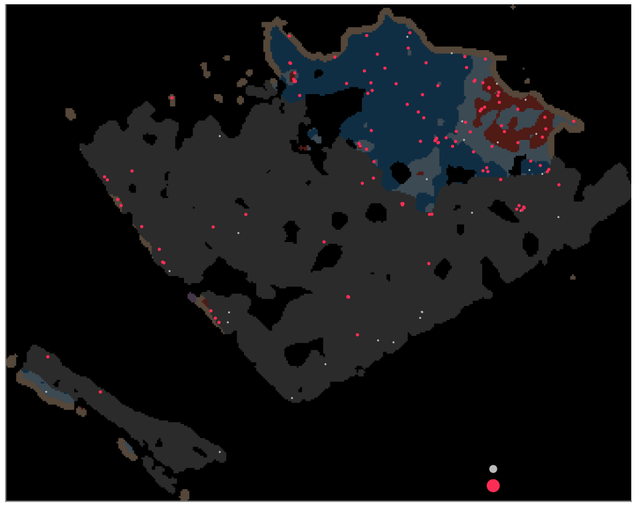

Myeloid (SPP1+ activated): 9,146

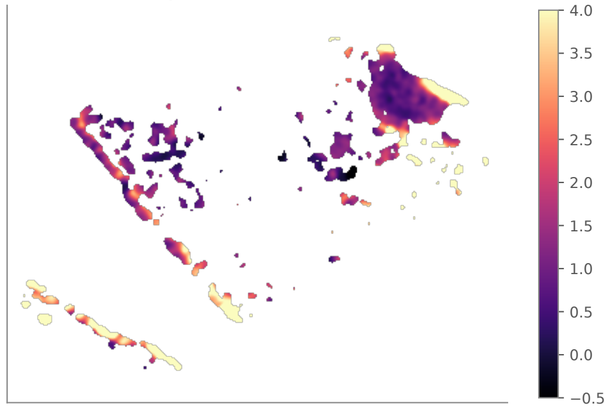

Myeloid: 101

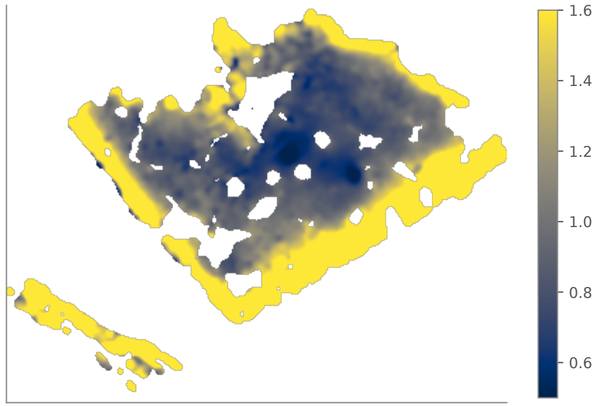

lymphocytes; CD45-bright in red

astrocyte vimentin (z within section)

ATP1A1 around cells (territory ÷ section median)

boundary-channel membrane contrast, all cells
